

MDB

GENERAL PURPOSE LOGIC MODULES

for use with
**Digital LSI*-11/2
& 11/23 Computers**

MLSI-1710 General Purpose Interface Module

- Basic LSI-11 Bus Interface
- Address decode circuitry
- Multiple interrupt vector priority selection
- Up to 20 user IC positions for wirewrap
- Will accommodate any .300, .400 or .600" center dual in-line packages
- Multiple external I/O provisions on module
- Dual module, mounts in one-half quad slot
- Cable connection to other MDB modules
- Includes pins in user wirewrap portion
- Power requirements +5V at 0.4A

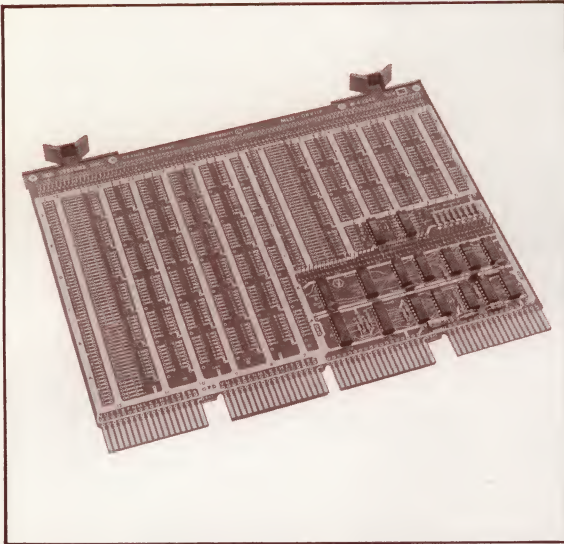

MLSI-11B General Purpose Direct Memory Access Interface Module

- Basic LSI-11 Bus Interface
- Address decode circuitry
- Address, word count and data registers
- DMA bus control and timing logic
- Interrupt vector priority logic
- Up to 26 user IC positions for wirewrap
- Will accommodate any .300, .400 or .600" center dual in-line packages
- Multiple external I/O provisions on module
- Cable connection to other MDB modules
- Quad module, mounts in one quad slot
- Includes pins in user wirewrap portion
- Power requirements +5V at 1.6A

MDB
SYSTEMS INC.

1995 N. Batavia Street
Orange, California 92665
714-998-6900
TWX: 910-593-1339

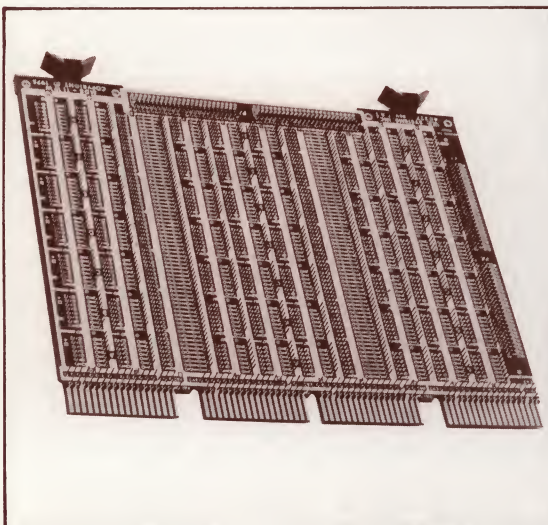

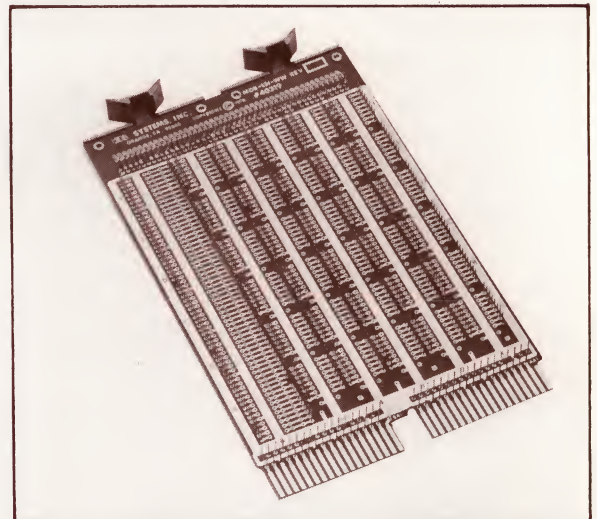

MLSI-DRV11P Bus Foundation Module

- Basic LSI-11 Bus Interface
- Address decode circuitry
- Multiple interrupt vector priority selection
- Up to 56 user IC positions for wirewrap
- Will accommodate any .300, .400, or .600" center dual in-line packages
- Multiple external I/O provisions on module
- Quad module, mounts in one quad slot
- Cable connection to other MDB modules
- Includes pins in user wirewrap portion
- Power requirements +5V at 0.4A

MLSI-WWB1 Universal Dual Wirewrap Module

- Space for up to 36 user DIP devices
- Pads for discretes at each position
- All holes plated through, UL approved FR4 material
- Wirewrap pins on component side of module
- Multiple external I/O provisions on module
- Will accommodate any .300, .400 or .600" center dual in-line packages
- Externally cableable to other MDB modules
- Optional sockets available
- Dual module, mounts in one-half quad slot
- Includes pins in wirewrap portion

MDB-11WWB Universal Quad Wirewrap Module

- Space for up to 70 DIP devices
- Pads for discretes at each position
- All holes plated through, UL approved FR4 material
- Wirewrap pins on component side of module
- Multiple external I/O provisions on module
- Will accommodate any .300, .400 or .600" center dual in-line packages
- Cable connection to other MDB modules
- Optional sockets available
- Quad module, mounts in one quad slot
- Includes pins in user wirewrap portion
